

VIGNESH P

FULL STACK DEVELOPER

CONTACT

- 9080181639
- vignesh.sof.eng@gmail.com
- <https://vignesh-102.github.io/profile/>
- Kadayanallur, Tamilnadu, India

SKILLS

Frontend:

Angular, React, JavaScript, TypeScript, HTML, CSS, SASS, RXJS, State Management (Redux Toolkit)

Backend:

Spring Boot, Spring Security, Microservices, webClient, kafka

Database:

MongoDB, PostgreSQL

Devops:

Git, GitHub, Docker (Basics), CI/CD (Fundamentals)

EDUCATION

B.E. ECE**Ramco Institute of Technology**

2016-2020

- In my time in college, I learned basics of Engineering and exposed to variety of technologies
- As a member of Photographic club, organized club events
- Done a final year project with Firebase cloud, Telegram bot and nodeMCU

LANGUAGES

English

Tamil

PROFILE

Full Stack Developer with 4.5+ years of experience building scalable, production-grade applications using Angular as the primary front-end framework, complemented by hands-on experience in React and Spring Boot. Adept at developing clean, maintainable code, optimizing performance, and contributing across the full SDLC. Seeking to leverage strong UI engineering expertise and expanding full-stack capabilities to deliver high-quality, enterprise solutions.

WORK EXPERIENCE

Senior Software Engineer (Full stack Developer)**Infosys**

April 2023 - Present

- Led development of major Angular application modules, delivering reusable components, Web Components for Magnolia CMS integration, and scalable front-end architecture.
- Built and enhanced Spring Boot microservices for production use, including REST APIs, service-to-service communication, GraphQL integrations, and database-layer workflows.
- Practiced microservices architecture by implementing modular backend services, API contracts, WebSocket event flows, and end-to-end communication across distributed systems.
- Expanded front-end capabilities by building React components and features using modern React patterns, TypeScript, and practical GraphQL/REST consumption.
- Collaborated with frontend, backend, and CMS teams to deliver end-to-end features, resolve integration challenges, and ensure seamless production deployments.

System Engineer (Angular Developer)**Tata Consultancy Services (TCS)**

Jan 2021 - March 2023

- Built and maintained core Angular application features using component-driven architecture, reusable modules, RxJS, and clean TypeScript practices.
- Progressed from learning Angular to independently owning and delivering production-ready UI modules, API integrations, and performance improvements.
- Implemented routing, reactive forms, interceptors, and service-based patterns to create scalable, maintainable front-end workflows.
- Collaborated with backend, QA, and product teams to refine requirements, fix defects, and improve overall UX with precise HTML/CSS/SASS implementations.

PROJECTS

Form Builder (Angular) - <https://vignesh-102.github.io/form-builder-app/>

Ride (Spring Boot Microservices) - <https://github.com/orgs/ride-hailing-backend/repositories>

Ecommerce (React) - <https://vignesh-102.github.io/ecommerce-app/>
